

In the Claims:

Please cancel Claims 2 and 6-10, without prejudice and amend Claim 1 as indicated below. The status of all claims is as follows:

1. (Currently Amended) A liquid-crystal display unit comprising:

a first board ~~having a~~ having at least one signal line, a line, at least one scanning line and a and at least one pixel electrode;

a second board having a common electrode, ~~the second~~ said second board opposing said first board;

a liquid-crystal layer provided between said first board and said second board;

and

a third board having at least one of a signal-line driver driving said at least one signal line and a scanning-line driver driving said at least one scanning line, ~~the third~~ said third board being separate from said first board and said second ~~board.~~ board,

wherein said third board is formed of the same material in the same process as said first board, and is divided from said first board.

2. (Cancelled)

3. (Original) The liquid-crystal display unit as claimed in claim 1, wherein said third board is connected to said first board by a flexible cable.

4. (Original) The liquid-crystal display unit as claimed in claim 1,  
wherein said third board is connected to said first board by a wire bonding.

5. (Original) The liquid-crystal display unit as claimed in claim 1,  
wherein said third board is connected to said first board by a flip-chip bonding.

6-10. (Cancelled)
